

# Connect 4 instructions.

- Cut out the blue rectangles.
- Laminate all three pages. Use gloss for page 2.
- You can either have a real connect 4 game or use dry wipe markers and colour in the squares on page 2.
- Ask the student to choose their colour by eye pointing or by finger/fist pointing.
- The object of the game is to get three in a row of your colour either horizontally, vertically or diagonally.
- The student eye points to the number corresponding to the row that they want the next counter/marker to fill a square.
- If the student is playing against you model the eye point or fist point.
