

# Camera Word Bingo!

This game is a variation of "Bingo" in which students practice reading their Camera words. As with all games, children have fun while learning!

Select about 10 Camera words that you have been working with, and write each one on an index card. (You can download these flashcards from [www.getreadingright.com](http://www.getreadingright.com))

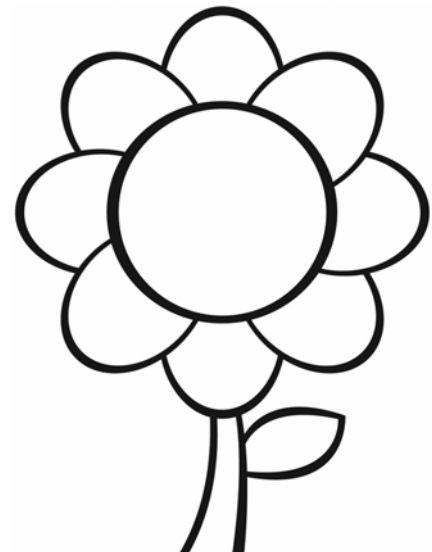

Instruct your students to copy each Camera word into a space of the Bingo template. (Each student should be writing words into different spaces, so each student's sheet will be different.)

Shuffle your deck of index cards, and call out one word at a time.

Students then cover each word that has been called out with a counter or button.

As they do so, be sure to have them read the word and chant the spelling of that word!

The first student with a row covered calls out, "Bingo!"
