

**RIVERBEND LOG HOMES**  
**“COTTAGE SERIES”**  
**KIT MATERIALS**

**SUBFLOOR:** Kiln dried 2 x 8 framing, with 5/8" OSB sheathing.

**EXTERIOR WALLS:** (96" high)  
“Cabin” grade milled cedar logs, pre-cut and numbered, with all gaskets, caulking and fasteners.

**ROOF SYSTEM:** Asphalt shingles over 5/8" OSB sheathing, on 2 x 10 framing for loft models and 6/12 trusses for the single level units.

**GABLE ENDS:** Single level units have log siding attached directly to the gable truss, with loft models having solid log, pre-cut to match rafters.

**WINDOWS:** Double hung, wood frame units, with thermal glass and custom installation “rough bucks”.

**EXTERIOR DOORS:** Pre hung steel units with hardware or sliding units, as per plan.

**PORCHES AND DECKS:** 2 x 6 Treated floor joists, with treated decking, railings and posts. (Cedar available as an option.)

**MISC. KIT MATERIALS:** Log siding for box joist cover, T&G cedar soffit materials, 1 x 6 pine fascia, all required nails, fasteners, and a step by step building manual  
**NOTE:** loft style units include the 2 x 8 loft framing.

Complete Interior materials packages are available for all units.

---

The Riverbend Cottage Series has been developed to meet the needs of those who like the style and convenience of a pre-cut log package, but in smaller, simpler designs and include all of the materials required to complete a weather tight shell - from subfloor to roof.

All Cottage Series units include 100% pre-cut cottage grade cedar logs, which are commonly shorter in length, with slight surface defects, and feature the “Proven” triple seal Riverbend joinery system.

The Riverbend Cottage Series units are intended for seasonal use and may not meet residential standards in all areas.
