## Health & Safety Consultants

# CDM Health & Safety Plan

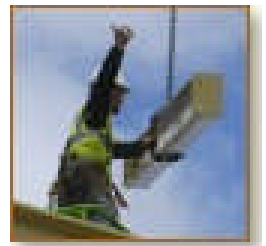

The health and safety plan will set out the arrangements for securing the health and safety of everyone carrying out the construction work and all others who may be affected by it. It will deal with:

- the arrangements for the management of health and safety of the construction work;
- the monitoring systems for checking that the health and safety plan is being followed;
- health and safety risks to those at work, and others, arising from the construction work.

## Features Include

- Written Plan – Ensure your compliance with the CDM Regulations
- A Plan unique to your Project – No unnecessary bureaucracy
- Fixed Price – Price certainty with no hidden costs

## Benefits Include

The Safetyexcel Health & Safety Policy Service can help you:

- Demonstrate how compliance with the CDM Regulations is achieved
- The successful management of Construction safety
- Lower insurance premiums

# Construction Safety

If under CDM you are asked to do something with no health and safety benefit you are probably misunderstanding what the regulations require.

Here is a summary of what the HSE says that CDM does require;

1. A realistic project programme with adequate time allowed for planning preparation and the work itself.
2. Early appointment of key people.
3. Competent duty holders with sufficient resources to meet their legal duties.
4. Early identification and reduction of risks.
5. Provision of health & safety information from the start of the design phase, through construction and maintenance and eventual demolition, so that everyone can discharge their duties effectively.
6. Co-operation between duty holders.
7. Proportionate effort and resources to be applied to managing health & safety issues.
